OUR REF.

Royal Enfield Continental GT

Due to a frustrated export order we have a limited quantity of Royal Enfield 250.c.c. Continental GT machines available for the home market.

Full spares service is available and it should be specially noted that these machines are in the export form which includes a complete spare set of gearbox internals to convert the five speed to four speed or vice-versa.

The trade price of these machines (ex-works) inclusive of P.T. and the additional gear set is..... £248.16s,4d.

Thus our suggested Retail Price of £292.10s. shows a margin of £43.13s.8d. plus an additional £6.13s.6d. (3 $\frac{3}{4}$ %) for payment in seven days, making a total gross margin of £50.7s.2d.

There is only a limited quantity of these highly desirable machines available. Any further details can be obtained from our Motorcycle Division.

(Dealers are naturally quite free to offer machines at reduced retail prices if they choose).
